To
The Friends of
Wharton School of USA

Dear friends

This letter of felicitation is being presented to you in recognition and appreciation of your grandeur project of funding for a comfortable school hostel big enough for ten children's accommodation with a room for cooking and dining facility for Khumjung school students.

Years ago our children from periphery village primary schools had to confront a big problem in finding a room in Khumjung village. Many of them would be frustrated to continue their higher education in the scarcity of accommodation around this school and would leave their student life forever. We were in search of an agency or a sponsor who could give us significant support in building a school hostel and give us a friendly love for a long time. Today when we take the name of Wharton school our hearts swell with pride and happiness. The name of Wharton school and its family resound in the hearts of the people of Khumbu with untold respect. We are equally grateful to Mr Ang Jangbu Sherpa (Phortse) for his strenuous task to find such a trusty and friendly school.

Our school and community feel it an ardent duty and a happy opportunity to confer this letter of felicitation as a symbol of the public greeting offered to Wharton school [USA] and its family by Khumjung school family and the people of Khumbu.
